## CVC/SDC Meet ~ January 12th, 2014

A sunny balmy January day was provided for the first CVC meet of 2014.

The group gathered at The Greek Islands Restaurant on West Broad Street where we had lunch.

The group viewed a compilation of promotional and testing films created by the U. S. Military and Studebaker Corporation about the Studebaker M29 Weasel. The video was provided by Preston Young and enjoyed by all.

After our meal, the group went to the parking lot where the restaurant owner took pictures of the group with our cars. These pictures can be viewed at our website.

As always, our Studebakers attracted a lot of attention and interest from the restaurant patrons.

The Studebaker line-up at The Greek Islands Restaurant:  
(L-R) Betsy & Preston Young 1965 Cruiser, Herman Gantt 1953 Champion Custom, Maze & Linwood Melton 1963 Avanti R2, Mike Welch 1941 Champion Custom, Debbie & Jim Jett 1962 GT Hawk

## CVC/SDC Meet ~ March 9th, 2014

The Central Virginia Chapter held its annual meeting at The Quaker Steak & Lube Restaurant located at 8000 West Broad Street in Richmond on March 9, 2014.

After we enjoyed lunch and some "Studebaker" conversation, the group adjourned to the parking lot where we held our business meeting next to Linwood Melton's Avanti.

The first order of business was to elect chapter officers for 2014. The current officers were nominated and approved by members attending to continue in their position for the next year. The chapter officers for 2014 are:

Jim Jett - President  
Preston Young - Vice President  
Betsy Young - Treasurer

After the election of officers, other business was discussed.

Ted Johnson made a presentation to the group about the creation of the Studebaker Choir that will be performing at this year's International Meet in Dover, Delaware. Ted informed the group that choir information is in Turning Wheels and encouraged any member who would like to add their voice to let him know.

Preston Young brought up the "Legacy of Studebaker" Endowment Campaign that is currently under way by the Studebaker National Museum Foundation. The effort to build a permanent endowment to support the Studebaker National Museum was discussed by the group and how CVC could help.

After discussion of the benefits to the preservation of Studebaker's history that having an endowment would make, a motion to contribute \$500 to the endowment campaign was made by Lee Harrison. The motion was seconded and carried with all members in attendance voting affirmative.

A discussion of chapter events for the rest of this year was held with the group. Different options were discussed for meets, such as attending a cruise-in as a group, town festivals, etc.. Members are encouraged to submit ideas for upcoming events. As a group we want to make our meets enjoyable for all our members.

The weather was great, our Studebakers were shining and the objects of Quaker Steak's patrons attention. With all club business completed, we adjourned and enjoyed the ride home.

*Ted Johnson came sporting his "Studebaker" tie. Ted had it made showcasing his 1962 GT Hawk*

*(L-R) Mike Walsh, Martin Pajka, Linwood & Maze Melton, Preston & Betsy Young, Lee & Becky Harrison, Fred & Marjorie Meiners, Debbie Jett, Patty & Ted Johnson*

### Virginia Aviation Museum

5701 Huntsman Road  
Richmond International Airport  
Richmond, VA 23250  
(804) 236-3622

The Central Virginia Chapter will visit the Virginia Aviation Museum located at Richmond International Airport for our May meet.

The Virginia Aviation Museum features the spectacular SR-71 Blackbird; 38 historic, vintage aircraft; reproductions of the Wright brothers' kite, gliders and famous 1903 Flyer; early flight memorabilia; a World War II diorama that includes the Tuskegee Airmen and Women's Airforce Service Pilots; and the Virginia Aviation Hall of Fame.

For more information about the Virginia Aviation Museum, visit their website: <http://www.vam.smv.org/>

After the museum tour, the group will travel to Carini Italian Restaurant located at 3718 West Williamsburg Road for Dinner.

Carini's decor depicts street scenes from the Sanzone's hometown, Carini, Sicily. The specialty is Sicilian-Italian cuisine.

Should be a great meet, mark you calendar!

## Studebaker Tech-Tip

**SAFETY ALERT**  
BY BREW DUDE

### Common Cleaners Can Turn Into Poison Gas

**Yep, I thought I was a goner this time! How simple it was to get in trouble. After seeing and reading so many warning labels, we tend to no longer pay them any heed.**

We buy chemicals and sprays at a local parts house and think "How can this be so bad, health-wise, if I'm buying it over the counter?" Here's how a small whiff of smoke almost dropped me where I stood.

I had a rush job to do welding four diesel tanks. I had to patch where they were pitted by road salt corrosion. Normally, I spray a little carb cleaner on the spot I'm going to weld, wipe it off, and then preheat the area with an acetylene torch to get rid of any solvents. Where I normally get carb cleaner was sold out, so I got a can of brake cleaner and went through my regular routine. To be on the safe side, I even had the shop door open and the exhaust fan on.

I started TIG-welding on Thursday afternoon and had no problem at first. But when I started welding across a really pitted area, I found a couple of drops of cleaner that were lurking in a deep dimple. As I came close to the cleaner, a small puff of white smoke popped up, and I almost passed out. I made it outside and sat for awhile in the fresh air. After about 10 minutes, I went to the office and sat at the computer to check the warnings on the brake cleaner can I used. That's when my whole left side started shaking for about 10 to 15 minutes. (I found out later I was having a seizure.)

When I was able to control myself again, I read the can's warning: "Vapors may decompose to harmful or fatal corrosive gases such as hydrogen chloride and possibly phosgene." After reading about hydrogen chloride, I started Researching phosgene. The active chemical in the brake cleaner is tetrachloroethylene. When this chemical is exposed to excessive heat and the gas argon, which is used in MIG and TIG welding, it produces phosgene. Phosgene gas can be fatal with a dose as little as four parts per million: basically a single small puff of smoke. Symptoms can be delayed from six to 48 hours after exposure. There is no antidote for

phosgene poisoning. If you do survive, the long-term effects can be chronic bronchitis and emphysema. My breathing still was hard a few hours later, but I felt a little better, so I didn't go to a hospital. The chlorine taste and smell in my mouth and nose were still strong. About midnight, I started coughing and my chest started hurting, but I thought that this would pass after a night's sleep. The next day (Friday), the symptoms got worse, and my kidneys started hurting, so I drank a bunch of liquids and cranberry juice. For the next four days, I was constipated and only urinated a lot of clear fluid with no smell. Though sometimes I felt okay, I was really in a lot of pain on and off for the next several days, as well as weak and tired. Then my urine became very dark and smelt terrible.

By the next Monday, nine days after the poisoning, I lost all balance. I was confused and could hardly talk, so I finally went to the emergency room. My symptoms were low O2 level, sugar levels out of control, vertigo, and I was hurting badly in my entire chest. I was admitted and put into ICU. My kidneys had probably shut down for those first four days. My lungs were damaged, so I had to be on O2. I had to be on insulin to keep my sugar in check. Since there is no antidote for phosgene, all I could do was try to rest and hope I got better. After CT, MRI, EKG, and EEG tests, as well as several blood tests it looked like, at least for now, there is no permanent damage. However, the MRI showed fluid in my sinuses and a buildup of fluids near my brain. The phosgene scarred my sinuses, which then became infected. The three doctors I saw said I was really lucky to make it.

After four weeks, it appears that I may have emphysema and chronic bronchitis. I'm on nasal medicine and an inhaler. My sinuses are severely scarred, and my smell nerves are damaged. I still have that awful chlorine taste and smell. I may also have pancreas damage. The insulin that I was taking had little effect on my sugar levels, so I'm now on some stronger medicines.

So why am I telling you all this? I hope to save someone from an easily avoidable severe illness or even death. The cleaning sprays commonly found in thousands of bike shops across the country can be just as dangerous if improperly used. Read the labels and warnings! Look up the chemicals you use. Just because you got away with it before, doesn't mean you won't get in trouble the next time.
